

Eric Chen

Berkeley, CA, 94705 | [LinkedIn](#) | 248-854-9485 | beiyuanchen@gmail.com

EDUCATION

- **University of California, Berkeley**, Astrophysics Aug 2026 - Expected May 2028
- **University of California, San Diego**, GPA: 3.71, Astrophysics Sep 2024 - Jun 2026
- **Cranbrook School**, GPA: 3.8/4.0, 1560 SAT May 2024

EXPERIENCE

Lawrence Berkeley Lab — Lazuli Space Observatory, Researcher Sep 2026 - Present

- Modeling spacecraft vibration and how it affects telescope image quality and wavefront sensing.
- Simulating reaction-wheel disturbances and analyzing their impact on optical measurements.

Space Enterprise at Berkeley, Tracking & Controls Engineer Sep 2026 - Present

- Improving rocket position tracking using GPS, motion-sensor, and altitude data.
- Analyzing pointing error to help a ground radio antenna follow the rocket during flight.

NASA Goddard — Roman Space Telescope, Integrated Modeling Intern Jun 2026 - Aug 2026

- Implemented real-time log streaming for the Roman Space Telescope's Structural, Thermal, and Optical Performance (STOP) pipeline, enabling continuous remote monitoring of simulation progress.
- Optimized MATLAB-based JittTool structural dynamics and jitter analysis workflows, reducing analysis runtime by 50%.

Astrophysics Research — UCSD, Researcher Oct 2025 - Present

- Developed neural-network models for 5-day geomagnetic activity forecasting, achieving ~85% recall with consistent performance across the forecast horizon.
- Built data pipelines to process NASA datasets, including automated data collection and image processing.

Astrophysics Research — Tsinghua University, Research Intern Jun 2025 - Sep 2025

- Developed a U-Net-based machine-learning pipeline to identify H I shell candidates in THINGS radio astronomy data.
- Achieved ~100% per-slice recall on held-out data for H I shell candidate screening.

Foxit Software, LLM Integration Intern Jun 2025 - Sep 2025

- Developed a Model Context Protocol (MCP) bridge server enabling multi-step LLM tool execution across the Foxit API suite.
- Integrated Qwen with Foxit APIs through MCP, enabling end-to-end LLM-driven tool workflows.
- Built a local evaluation framework for testing LLM tool selection and multi-step orchestration.

LEADERSHIP

LIVE AI Best Coast Hackathon (UCSD Location), Organizer Jul 2025 - Present

- Recruited and managed cross-campus teams of speakers, panelists, judges, and student organizers.
- Coordinated event logistics for 100+ participants, including venue booking, catering, and departmental approvals across multiple UCSD offices.

HONORS & AWARDS

- Co-author, 46th COSPAR Scientific Assembly, Florence, Italy Aug 2026

SKILLS

Programming: Python (advanced), MATLAB (advanced), C++ (intermediate), Java (intermediate), JavaScript

Scientific/ML: PyTorch, TensorFlow, NumPy, SciPy, Astropy, Git, Linux, LaTeX

Languages: English (Native), Mandarin Chinese (Native)
